

For the Farmer.

Plowing for Wheat.
Many of our farmers are in the habit of plowing but once for the above crop; and although they admit the benefit of a second plowing, always excuse themselves upon a plea of want of time, or some other like excuse. They do not seem to realize that their business is to invest as much labor in the putting in of the crops as they can with profit, and that it would be much better to invest their money in this way than in bank or government stocks.

They argue that they can get their ground into just as good order by harrowing; this I deny—they may pulverize the surface so that at a superficial glance it may seem to be in as good order; but a deeper and more careful examination will show that it is full of lumps and unbroken clods, into which the roots cannot penetrate. But granting that they can put the ground into as fine a condition by harrowing as I can by a second plowing, I would still follow the practice; for I can plow twice, with less wear and tear of teams, than they will exhaust with the one plowing, because I plow the first time as soon as the oats is off, while the ground is mellow and unbroken by exposure to the sun. During this time they must haul out their manure. My second plowing will take no longer than their harrowing, providing they do it properly.

There is still another important point in favor of plowing twice; practical farmers and scientific men have generally come to the conclusion that barn-yard manure should be kept as near as possible to the surface, so that it is covered. It is also a fact that soil for wheat or any other crop should be deeply stirred. Now we cannot by any possible means attain both these results from one plowing. If deep enough to stir the soil thoroughly it will bury the manure too deeply, and if the plow is so shallow as not to cover the manure too deeply, the soil is not stirred deep enough to satisfy the other necessary condition.

By plowing twice I am able to accomplish both these objects, for I can make my first plowing of the usual depth, and afterwards turn under the manure by a shallow furrow, and by rolling the field once, can put it into fine order for the drill without any harrowing.

Those who have tried "twice plowing for wheat," and have observed its effect upon the ensuing grass crop, will seldom if ever relinquish the practice; for it always seems to insure a much better growth or set of grass seed, which may perhaps be owing to the improved condition of soil with reference to pulverization.

Plowing but once will seldom kill all the oats which spring up from the seed shakers off in harvesting the crop, and by growing another out more or less of the wheat, although it has eventually to succumb to cold weather and frost. The second plowing destroys all the oats, for between the two plowings the seed of the volunteer crop has time to spring up, and often forms quite an addition of green manure when turned under and killed by a second plowing. *German-tonen Telegraph.*

SUMMER PRUNING OF GRAPEVINES.—Dr. John A. Warder, the experienced grape grower of Ohio, writes to the American Journal of Horticulture as follows:—"Pinching off the ends of some of the shoots is a very important part of summer pruning; but it is one which has been very much abused in practice, and still more so in the criticisms of those who theoretically condemn the practice. It is well for us to consider that, in all pruning of vines, we must remember the necessity of keeping the plant in due shape as to its wood, and that we desire to have this properly distributed. We want the new growth, which goes to form the canes for the next year's fruitage, formed low down on the stock, and not at the ends or higher parts of the vine, which soon give up high, naked stocks, and bare, empty trellises, such as may every where be seen."

LIMING HAY.—There are different opinions existing as to the advantages of liming hay when storing it. We have had the testimony of most successful farmers that it is an excellent practice. But during the past few days one gentleman, who said he limed his hay last year, told us his stock did not relish it as well as the unlimed. Who has had a similar experience?

During these harvest days, rather than risk exposure to a long rain, we should put the wheat in stack, or mow when damp, liming it. The objection to the practice in the case of hay cannot be urged against wheat. It may be found excellent practice to use it in the racks of wheat cut by a header, especially if there is a good deal of grass or weeds in the grain, as there will be apt to be in many fields this season.

TO MAKE A STACK SETTLE TRUE.—There are two things to do this—keeping the centre up, and pitching on from all sides. This last will make the stack settle evenly. Pitching on two sides will balance it; but it is not so good, as it does not make it evenly solid all round, but leaves some parts lower, where the water is apt to settle. By keeping the stack high in the centre as it is built up, and sloping outward, the rain will be unable to penetrate, as like a roof, it will ward it off. Keep high in the middle from bottom to top, and pitch on all sides to make it equally solid.

HOG CHOLERA.—The following is said to have cured hundreds of cases of hog cholera: Take five pounds of the painting material known as "Venetian red," which can be obtained at any drug or paint store—and mix it with thirty gallons of either sour or sweet milk. On this material may be mixed in smaller quantities, if the same proportions are maintained. This mixture, thoroughly stirred together, is to be placed in the troughs, where hogs may go and drink freely of it for two or three days.

The dog-worm blossoms were unusually abundant this year. This is regarded by prognosticators as a sure indication of a heavy corn crop.

To make fence posts last, apply a shovelful of ashes to each post, just on the surface.

The Kansas Chief.

SOL. MILLER, Editor and Publisher.
Terms:
Two Dollars a Year, in Advance. Payment should be made strictly in advance; otherwise, the rate of \$3 per year will be charged, at the discretion of the publisher.

Advertising.

A. & L. THACKER,

Proprietors of the
**WHITE CLOUD
CITY FLOURING MILL.**

Have lately furnished it with the most
Valuable Modern Improvements,
which makes it a FIRST-CLASS MILL in all respects. The grinding will be done in a
SUPERIOR MANNER,
under the supervision of one of the proprietors, who is a Practical Miller.

We have put up an additional run of burrs, and now have two runs for wheat and one for corn, giving us facilities for almost double the former amount of grinding. The grinding will be done at all times, except on Monday of each week, and the flour warranted, if the wheat is good.
We will exchange Flour for Wheat, if customers have not time to wait for their flour; or we will buy their Wheat, and sell them Flour. We will pay the
Highest Market Price in Cash for Wheat; or we will store the farmer's Wheat, and let him draw out Flour as he wants it. Farmers will find inducements offered at these Mills that they will find at no other.

Connected with the Mills also is a stable, which can be used by the farmer or other customer for his horses while he is waiting for his grain, either for a short time or over the night, free of charge. **A. & L. THACKER.**
White Cloud, October 11, 1866.

WHITE CLOUD CARDING MILL!

THE subscribers hereby announce that they have just procured a Number One
CARDING MACHINE,
of the latest and most improved pattern, and are now prepared to Card Wool in the best style, and at the shortest notice.

Customers will be required to furnish 1 pound of good, clean Grass, or every 7 pounds of Wool. The work will be warranted, if the Wool is brought in good condition.
We have employed a thoroughly experienced person to superintend the Carding; so that customers may rely upon having their work done in a superior manner. Terms as reasonable as can be had in the country.
Give us a call at our establishment, adjoining the White Cloud Flouring Mills.
A. & L. THACKER.
White Cloud, May 9, 1867.

WHITE CLOUD PLANING MILL!

THE subscriber has established a Planing Mill at White Cloud, and is now prepared to dress Siding, Flooring, or do any other description of Planing, on the shortest notice, and in the best style.

Persons who contemplate building, will save time and money by having their lumber dressed at this Mill.
The attention of the people of the river towns, both above and below, is called to this Mill, as bills of lumber can be filed at all times, and promptly shipped by boat, during the season of navigation.
The public are invited to call and see our work. Prices will be reasonable.

WHITE CLOUD, KANSAS, May 23, 1867.

LUMBER!

One More Saw Mill!
THE undersigned respectfully announce that they have erected a Saw Mill at White Cloud, and are now ready to furnish all kinds of lumber required by the community. A stock of FENCING, SIDING, FLOORING, &c., kept on hand, and bills promptly saved to order.

Our prices are the lowest market rates. We will not be undersold.
Call at the Upper Mill, near the Ferry Landing.
W. D. BEELER & SONS.
White Cloud, April 11, 1867.

LUMBER! LUMBER!

J. F. & M. S. MAUCK
ALWAYS AHEAD!

WE would respectfully announce to the public, that we enter into the Lumber trade of 1867 in full force and complete trim. A large and well selected stock of
Fencing, Siding, Flooring, Sheeting,
JOISTS, SCANTLING, &c.,
always on hand; and any kind of lumber not kept on hand, promptly saved to order.
We guarantee our Lumber to be as smooth, and as straight and correctly sawed, as any produced in the country.
We will not be undersold at \$1.75 per hundred feet, and will continue to reduce the price as fast as the times will justify.
J. F. & M. S. MAUCK.
White Cloud, March 14, 1867-ly.

Persons having any description of iron work to be done, are solicited to call, and satisfaction will be guaranteed. Special attention given to Horse-shoeing. Prices reasonable.

WM. VAN BUSKIEF.
White Cloud, Feb. 11, 1867-ly.

"WOOD'S" PRIZE

MOWERS AND REAPERS!
Over 60,000 Manufactured, and Now in Use in This Country and Europe.

These world-renowned machines were awarded the first prize, Ten Pounds Sterling, at the Great Quadrennial Trial at Plymouth, Eng. July, 1865; and at the Great National Field Trial, held at Auburn, N. Y., in July, 1866, the First Premium, GRAND GOLD MEDAL.

THE PRIZE MOWER.

While it retains all the advantages which have made it so universal a favorite, it is greatly improved by the addition of
STEEL LINED GUARDS,
NEW FITTING CONNECTIONS,
STRONGER KNIVES,
SPRING SEAT,
ADJUSTABLE FOLDING SHOE,
making it a perfect machine. The lightest draft, the most durable, and at the same time the most simple, and best cutting machine in the world.

The Self-Rake Reaper,

Is justly called the "Victor of every contest," and is constructed on the most scientific principles. The new Mowing Attachment gives the customer the satisfaction of making one of the most convenient combined Self-Rake Reapers known, and we fully warrant it.

THE HAND-RAKE REAPER,

Is at the same time the cheapest and the best of its kind ever offered.
It cuts a swath five feet wide in Reaping, and four and a-half feet in Mowing. As a Mower, it is equal to the best Folding Bar Machine. The ease with which it is managed, and in changing from Mower to Reaper, or vice versa, will at once recommend it.

Manufactured by the
WALTER A. WOOD
Mowing and Reaping Machine Co.,
Hoosick Falls, N. Y.

LATEST FASHIONS DEMAND

**J. W. Bradley's Celebrated Patent
DUPLEX ELLIPTIC
(OR DOUBLE SPRING)
SKIRT.**

They will not bend or break like the Single Spring, but will preserve their perfect and graceful shape when three or four ordinary Skirts and their fastenings are made. The Hoops are covered with double and twisted thread, and the bottom rods are not only double springs, but twice (or double) covered: preventing them from wearing out when dragging dresses, skirts, &c., &c., &c.

The wonderful flexibility and great comfort and pleasure to any lady wearing the Duplex Elliptic Skirt, will be experienced particularly in all crowded Assemblies, Operas, Carriages, Railroad Cars, Church Pews, Arm Chairs, for Promenades and House Dress, as the Skirt can be folded when in use to occupy a small space as easily and conveniently as a silk or muslin dress, an invaluable quality in traveling, not found in any Single Spring Skirt.

A lady having enjoyed the pleasure, comfort, and great convenience of wearing the Duplex Elliptic Steel Spring Skirt for a single day, will never afterwards willingly dispense with their use. For Children, Misses and Young Ladies, they are superior to all others.

The Duplex Elliptic is a great favorite with all ladies, and is universally recommended by the leading Fashionable Parisian and London Dressmakers. It is the only Skirt of the FASHIONABLE WORLD.

To enjoy the following inestimable advantages in crinoline, viz: superior quality, perfect manufacture, stylish shape and finish, flexibility, durability, comfort and economy, inquire for J. W. Bradley's Duplex Elliptic, or Double Spring Skirt, and be sure you get the genuine article.

CAUTION.—To guard against IMITATIONS, be particular to NOTICE that skirts offered as "DUPLEX" have the red ink stamp, viz: "J. W. Bradley's Duplex Elliptic Steel Springs," upon the waistband—none others are genuine. Also Notice that every Hoop will admit of being passed through the centre, thus revealing the two (or double) springs braided together therein, which is the secret of their flexibility and strength, and a combination not to be found in any other Skirt.

FOR SALE in all Stores where FIRST CLASS Skirts are sold throughout the United States and elsewhere.
Manufactured by the Sole Owners of the Patent,
WESTS, BRADLEY & CARY,
97 Chambers and 79 & 81 Rensselaer Sts., N. Y.
May 16-3m.

LYON'S PERIODICAL DROPS!

**THE GREAT FEMALE REMEDY
FOR IRREGULARITIES!**

I have tested these Drops in my own practice, over ten years, and do not hesitate to say, that nothing has yet been developed by medical research, that sets so powerfully, positively, and harmlessly, in cases of female irregularity, as does this medicine. In all recent cases it never fails, while thousands who have been long sufferers, are indebted to it for the boon of health to-day.

Although so powerful and positive, they are perfectly harmless, and may be used at all times, except when specially forbidden in the directions.

They have been extensively employed by eminent physicians in France and England, as well as in my own practice, over ten years, and I have yet to hear of the first instance of failure. I could give you testimonials of their efficacy from ladies all over the Northern and Western States, were they not in their nature private. Over 100,000 bottles have been sold the past year, and I hope and trust as many sufferers have been benefited. I am well aware that a remedy so potent to remove all obstructions, may be used for a bad purpose, but trust that where one bottle is thus used, ten may fall into the hands of really needy sufferers.

To all who suffer from any irregularity; painful, difficult, excessive, offensive or obstructed Menstruation, Leucorrhoea, or the train of diseases that follow, I would say, try a bottle of Dr. Lyon's Periodical Drops. Being a fluid preparation, their action is more direct and positive than any pills or powders. Explicit directions, bearing my fac-simile, accompany each bottle.

They may be obtained of nearly every druggist in the country, or by enclosing the price to
